THE BAND

RAW FRENCH GRUNGE, STRAIGHT OUT OF LILLE.

HERNEST is a rising underground rock band from northern France. Four musicians, heavy guitars, choruses sung in French, and stories taken from real life rather than from a screen.

SINGLE 01

VASTE PAYS

A raw portrait of a young man from rural France. Never been on holiday, made it through university while working on the side, and learned to hide where he comes from. Gritty realism set against a social media era where a fake lover is just another follower.

SINGLE 02

POLITIQUE ET XANAX

Not a song against politics, but against leaning on it too much. Blaming the system hurts less than facing your own reality: it goes down like a Xanax. A non-partisan, clear-eyed rock track about taking your life back into your own hands.
